Digital Literacy Portfolio Project

Name: C Midun Narayanan

Registration Number: 25BCG10010

Branch: B.Tech CSE Gaming Technology

Course Code: CSE0001

Date: 21.03.2026

INTRODUCTION

This project focuses on developing digital literacy skills that are essential for students in today’s technology-driven world. As a Student Digital Ambassador, the aim was to explore various digital tools, platforms, and practices that enhance online communication, collaboration, and safety. The project includes tasks such as creating an infographic, building a digital portfolio, exploring coding and collaboration platforms, understanding email etiquette, and learning about cybercrime awareness. Through this project, I gained practical experience in using digital tools effectively and responsibly.

Create a Digital Literacy Awareness Infographic

I created a digital literacy infographic using Canva. The infographic explains the concept of digital literacy, safe internet practices, and the importance of maintaining a professional online presence. I used simple visuals and clear text to make the information easy to understand. One challenge I faced was arranging the content in a visually appealing way without overcrowding the design. This task helped me understand how to present information effectively using digital tools.

Build Your Student Digital Portfolio

I created my digital portfolio using GitHub, LinkedIn, and Kaggle. GitHub is used to store and showcase coding projects, LinkedIn helps build a professional network, and Kaggle is useful for learning data science. I updated my profiles with basic information and plan to use these platforms over the next four years to improve my skills, connect with professionals, and prepare for internships and placements.

Explore Coding & Collaboration Platforms

I used HackerRank to solve a beginner-level coding problem, which helped me understand basic problem-solving skills. I also created a Google Form quiz related to digital literacy. The form included multiple-choice and short-answer questions. I learned how to collect responses and view them in a Google Sheet. These tools will help me improve my coding abilities and collaborate effectively in academic activities.

Draft a Professional Email & Etiquette Guide

This task focused on professional communication. I wrote two formal emails, one requesting an assignment extension and another applying for an internship. I also created a checklist for responsible social media use. Poor communication, such as unclear or unprofessional emails, can lead to misunderstandings. Using proper structure, tone, and clarity can improve communication and create a positive impression.

Cybercrime Awareness Case Study & Prevention Guide

While researching cybercrime, I learned how phishing attacks can easily trick users into sharing sensitive information. I was surprised by how common these attacks are. This made me more aware of online threats. I will be more careful while clicking links and will verify sources before sharing personal information online.
